JUDGING:

- Presented images will be adjudicated "Live" via an adapted format of "Remote Judging". Various categories have been allocated to groups of judges who will judge the allocated category live at venues as indicated above under categories.
- The "remote judges" will receive screen calibration instructions, as well as the official PSSA test calibration application to ensure uniformity in the presentation of images.
- Each photo will be judged by 3 judges. The sum of the 3 scores will represent the final score. Where 2 or more adjudicators are of the opinion that an image does not conform to the definition of the entered category, the image will be rejected. In the case where 1 adjudicator is of the opinion that an image does not conform to the definition of a specific category, the average point of the remaining 2 adjudicators will represent his final score.
- Where there is indecision as regards disqualification the judges will take a decision after discussion. Any image that the Salon Director considers pornographic or offensive to the public may, on consultation with the judges, be disqualified.

DEFINITIONS:

MANIPULATION

Manipulation shall constitute any or all of the following modifications to the original image:

- Adding an element to the image that was not contained in the original capture;
- Removing an element from the image that was contained in the original capture;
- Moving or repositioning an element of the image that was contained in the original capture.

In the categories Nature and Photojournalism, manipulation is not allowed.

In Open there are no restrictions whatsoever in the way authors choose to post process an image.

The following actions are allowed and are not seen as manipulation:

- Cropping;
- Correction of lens distortion, chromatic aberrations, purple fringing, lens vignette and vertical / horizontal perspective adjustments;
- Removal of dust spots or scratch marks from sensor or scanned images;
- The blending of different exposures of the same scene to broaden the dynamic range e.g. High Dynamic Range (HDR);
- Photo stacking to overcome the limitations of the digital sensor heat artefacts in long exposures;
- Focus stacking to widen the depth of field especially in Macro photography.

In the case of Nature and Wildlife HDR and focus stacking will not be considered as manipulation and may be used provided that the end result is a faithful representation of the original scene. HDR and Focus Stacking are not allowed in Photojournalism.
