- The "remote judges" will receive screen calibration instructions, as well as the official PSSA test calibration application to ensure uniformity in the presentation of images.
- Where 2 or more adjudicators are of the opinion that an image does not conform to the definition of the entered category, the image will be rejected. In the case where 1 adjudicator is of the opinion that an image does not conform to the definition of a specific category, the average point of the remaining 2 adjudicators will represent his final score.
- Where there is indecision as regards disqualification the judges will take a decision after discussion.
- Any image that the Salon Director considers pornographic or offensive to the public may, on consultation with the judges, be disqualified.

DEFINITIONS:

MANIPULATION

Manipulation shall constitute any or all of the following modifications to the original image:

- Adding an element to the image that was not contained in the original capture;
- Removing an element from the image that was contained in the original capture;
- Moving or repositioning an element of the image that was contained in the original capture.

In the categories Nature / Wildlife and Photojournalism, manipulation is not allowed.

In Open there are no restrictions whatsoever in the way authors choose to post process an image.

The following actions are allowed and are not seen as manipulation:

- Cropping;
- Correction of lens distortion, chromatic aberrations, purple fringing, lens vignette and vertical / horizontal perspective adjustments;
- Flipping an image horizontal or rotate;
- Removal of dust spots or scratch marks from sensor or scanned images;
- The blending of different exposures of the same scene to broaden the dynamic range e.g. High Dynamic Range (HDR);
- Photo stacking to overcome the limitations of the digital sensor heat artefacts in long exposures;
- Focus stacking to widen the depth of field especially in Macro photography.
-

In the case of Nature and Wildlife HDR and focus stacking will not be considered as manipulation and may be used provided that the end result is a faithful representation of the original scene. HDR and Focus Stacking are not allowed in Photojournalism.

1. Category 1: STREET PHOTOGRAPHY - Manipulation is not allowed - Monochrome

Street photography records unposed scenes in public places. The primary subject is people and/or

2. Category 2: SCAPES - Manipulation is allowed - Colour

3. Category 3: SPORT - Manipulation is not allowed - Colour

Sports photography covers any aspect of a sporting event. Images must depict an active pastime or recreation involving physical exertion and/or skill that is governed by a set of rules or customs and often of a competitive nature. The level of sport can range from children playing a sport to the Olympic Games. Images in this section could include the spectators or judge or umpire in a sporting event. Dance productions like ballet and Air Shows are deemed not to be sport and hence not allowed in this category.

4. Category 4: NATURE - Manipulation is not allowed - Colour

Nature photography records all branches of natural history except anthropology and archaeology. This includes all aspects of the physical world, both animate and inanimate, that have not been made or modified by humans. Nature images must convey the truth of the scene that was photographed. Images that directly or indirectly show any human activity that threatens the life or welfare of a living organism are not allowed. The most important part of a Nature image is the nature story it tells. High technical standards are expected, and the image must look natural. Adding a vignette or blurring the background during processing is not allowed. Objects created by humans, and evidence of human activity, are allowed in Nature images only when they are a necessary part of the Nature story. Photographs of human-created hybrid plants, cultivated plants, feral animals, domesticated animals, human-created hybrid animals and mounted or preserved zoological specimens are not allowed. Images taken with subjects under controlled conditions, such as zoos, are allowed. Controlling live subjects by chilling, anaesthetic or any other method of restricting natural movement for the purpose of a photograph is not allowed. No modification that changes the truth of a Nature image is allowed. Images may be cropped but no other technique that removes, adds or moves any part of the image is allowed. Techniques that remove elements added by the camera, such as dust spots, digital noise and lens flare are allowed. Complete conversion of colour images to greyscale monochrome is allowed. Partial conversion, toning and infrared captures or conversions are not allowed. Images of the same subject that are combined in camera, or with software, by focus stacking or exposure blending are allowed.
