

CERPS CONGRESS 2024

On the 26th of October, the Eastern Gauteng Region (Cerps) Congress was hosted by F Stop Photographic Society at the Shed and Silo venue in Benoni.

The event was highly successful with 110 attendees, hailing from 17 Camera Clubs across Gauteng and including 14 members who were not affiliated to any Camera club. 6 Camera brands were in use on the day at the numerous photographic stations, which included models, superb vintage cars, still life/tabletop and some beautiful horses. Plenty of photo opportunities for all attendees.

The 2024 Congress was different in character, with a panel of experts answering audience questions on general photographic topics. This created a lot of interest stemming from the originality of the concept. Additionally, we had a superb motivational talk from Lood Goosen entitled “Resilience builds your future, which enthralled and captured the imagination with concepts that are applicable in photography and across life in general.

The results of the annual Cerps Interclub competition were announced, with Edenvale again taking overall honors. On the individual level Laetitia Kenny again scooping the best overall photo from the very fierce competition

Congratulations to F Stop and thank you to all contributors and sponsors on a superb event, with a great choice of venue and an excellent and enticing program.
